

## Aus Lock & Safe Company Environmental Policy

We are committed to leading the industry in minimising the impact of our activities on the environment.

We accept responsibility for the harmful effects our operations have on both the local and global environment and we are committed to reducing them.

We will measure our impact on the environment and set targets for ongoing improvement.

We will comply with all relevant environmental legislation.

We will implement a training program for staff to raise awareness of environmental issues and enlist their support in improving our performance.

We will encourage the adoption of similar principles by our suppliers.

The key points of our strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise harmful emissions through the selection and use of its fleet and the source of its power requirement.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.

Sincerely

Jason Catlow  
Director
